Additional Homeless Populations Summary for FL-506 - Tallahassee/Leon County CoC

Date of PIT Count: 1/27/2020

Population: Sheltered and Unsheltered Count

Other Homeless Subpopulations

	Sheltered			Unsheltered	Total
	Emergency	Transitional	Safe Haven		
Adults with a Serious Mental Illness	215	29	0	14	258
Adults with a Substance Use Disorder	84	20	0	12	116
Adults with HIV/AIDS	15	3	0	1	19
Adult Survivors of Domestic Violence	113	27	0	2	142

Methodology for FL-506 - Tallahassee/Leon County CoC

Sheltered Population Total

1. What data source(s) was used to produce the total number of people included in the sheltered population (staying in an emergency shelter, Safe Haven, or transitional housing) on the night of the count? Please indicate the percentage of the PIT count derived from each of the sources. (If a source was not used, please enter zero).

HMIS Data	73%
Provider-level surveys	15%
Client-level surveys	12%
Observation	0%
Other	0%
Total	100%

2. Was the CoC able to collect information about the number of people being sheltered on the night of the count from all emergency shelters, Safe Havens, and transitional housing projects listed on the HIC or only some? listed on your HIC or only some?

- Complete census count

3. What information or method(s) was used to de-duplicate the count of the total number of people included in the sheltered population?

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number
- Interview/survey question(s) with screening questions (e.g., have you already completed a count survey)

Sheltered Subpopulation

4. What data source(s) was used to produce the demographic and subpopulation data included in the sheltered population (staying in an emergency shelter, Safe Haven, or transitional housing) on the night of the count? (select all that were used)

- HMIS Data
- Provider-level surveys

5. Was the CoC able to collect information about the demographic and subpopulation characteristics of all sheltered people or only some?

- All sheltered people

6. Looking at the change in your sheltered count from last year's count, please choose up to three reasons that best explains these changes from the drop down list below.

- Change in participation of programs serving subpopulations (e.g., veterans, youth)
- Increased or improved PIT count training
- Change in transitional housing capacity
- Change in other supportive housing subsidy capacity
- Impact of coordinated entry

Please provide a brief description of these specific factors (500 word limit):

Regarding the change in program participation and how it impacted our total homeless and particularly our sheltered count, we discovered that there were three projects (Care Tallahassee, Good Samaritan Network and Chelsea's House) that do not exclusively serve homeless individuals any longer which accounted for approximately 60 individuals on the 2019 count. Care Tallahassee and Good Samaritan Network both serve men exiting prison and therefore the population does not count as homeless under the HUD definition due to them being in prison longer than 90 days. These 3 programs did not confirm they had any cases on the night of 1/27/20 that would meet the homeless definition for the HUD PIT count. The problem we discovered is that because these programs do not exclusively serve homeless individuals, the inclusion of all or part of their census count in 2019 was inappropriate. In 2020, we corrected this issue by requiring the programs to identify specific numbers of persons who met the definition for the HUD PIT count. This correction had a substantial impact on the difference between our 2019 and 2020 total and sheltered count.

Unsheltered Population

7. What approach(es) was used to count the total number of people included in the unsheltered population during the PIT count. (select all that were used)

- "Night of the count" - complete census
- "Night of the count" - known locations
- HMIS

7a. Were certain areas within the CoC geography specifically excluded because the CoC had reason to believe there were no unsheltered people in those areas?

Yes

7b. How did the CoC select the areas that were included for canvassing?

- Areas were not selected randomly, but an effort was made to use local knowledge to target known locations (e.g., areas with known concentrations of unsheltered homeless people)

7b1. Did the CoC adjust the information in some way (e.g., statistical adjustment or extrapolation) to account for areas within the CoC geography that were not canvassed but where unsheltered people might have been on the night of the PIT count?

No

7c. In areas that were canvassed, did the CoC count all unsheltered people in those areas or a sample of people?

- All people encountered during the count

8. What information or method(s) was used to de-duplicate the total count of people in the unsheltered population? (Check all that apply)

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number
- Interview/survey question(s) with screening questions (e.g., have you already completed a count survey)

Unsheltered Subpopulations

9. What approach(es) was used to collect demographic and subpopulation data about unsheltered people included in the unsheltered population during the PIT count?

- Surveys/interviews of people identified as unsheltered on the night of the count, but completed at a later date

10. Were all people who were encountered during canvassing on the night of the count or during post night of the count PIT activities asked to complete a survey/interview?

- All people encountered were surveyed

11. What information or method(s) was used to produce an unduplicated total count of homeless people across your sheltered and unsheltered populations?

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number
- Comparison of unique client identifiers (not PII)
- Interview/survey question(s) with screening questions (e.g., have you already completed a count survey)

12. Looking at the change in your unsheltered count from last year's count, please choose up to three reasons that best explains these changes from the drop down list below

- Change in participation of programs serving general homeless populations (e.g., singles, families)
- Change in participation of programs serving subpopulations (e.g., veterans, youth)
- Change in awareness of PIT count and relevant resources
- Change in other supportive housing subsidy capacity

Please provide a brief description of these specific factors (500 word limit):

The 2019 PIT count was 91, compared to 109 in 2020 for an increase of 18 people. During the time of PIT count, our transitional living program for youth (CCYS TLP) being phased out due to a loss of federal funding. Only one youth was at the TLP the night of the PIT. Youth who would typically be TLP residents fell into the unsheltered category this year. Also, a long-term permanent housing project (Mission Oaks) that previously exclusively served men exiting homelessness was taken on by new management and their focus is towards low-income persons who were not previously homeless. This change, though made a couple of years ago, is now contributing to our CoC's increase in unsheltered homeless. Moreover, our count was more comprehensive than ever before. We included better coverage of our CoC's geographical area and fully surveyed one of our eight counties for the very first time, Jefferson County, making this the most comprehensive PIT in our CoC's history. By being more comprehensive, we identified more unsheltered individuals.

Point In Time Methodology for FL-506 - Tallahassee/Leon County CoC

- HMIS data from street outreach and/or other providers
